

TRAVIS ERWIN

SUMMARY

Computer Science student skilled in C++, Java, SQL, and Python, experienced in 3D graphics and secure applications. Leverages strong problem-solving and logistics management skills to enhance software development projects, seeking an internship or entry-level role in software development.

PROJECTS

- Developed an Android weight tracking application in Java using Android Studio and SQLite, featuring user authentication, goal tracking, weight logging, and SMS milestone notifications.
- 3D Graphics Application (C++ / OpenGL), Built 3D scene using OpenGL rendering pipeline with camera movement, transformations, and lighting, Implemented perspective and orthographic projections
- Animal Management System (Java), Developed application for intake, reservations, and reporting, Applied OOP and input validation
- MongoDB CRUD App (Python), Created module for database operations using PyMongo, Implemented queries and data filtering
- Secure Web App (Java / Spring Boot), Implemented SHA-256 hashing and REST endpoint, Configured HTTPS and identified vulnerabilities
- Software Testing & Validation Suite (Java / JUnit), Developed Contact, Task, and Appointment systems in java and tested using JUnit, Applied black-box testing techniques, Achieved high code coverage through white-box testing
- Data Structures & Algorithms Project (C++), Implemented data structures including binary search trees and hash tables, Developed algorithms for searching, sorting, and efficient data retrieval, Processed and organized data from external files, Analyzed performance and efficiency of different data structures
- Built a first-person arena shooter prototype in Unreal Engine 5, implementing gameplay systems including enemy AI, behavior trees, AI perception, projectile weapons, collision detection, health management, respawn logic, pickups, and HUD elements.

WORK EXPERIENCE

Delivery Driver

Uber / Spark / Amazon Flex | Wichita, Kansas | May 2020 - Current

- Managed high-volume deliveries, optimizing routes to enhance efficiency
- Resolved logistical issues to ensure timely deliveries
- Communicated with customers to confirm delivery details and address inquiries, fostering positive relationships.

Production & Logistics

Walnut River Brewing | El Dorado, Kansas | March 2017 - May 2020

- Coordinated inventory and logistics, optimizing production flow.
- Collaborated with diverse teams to address product-related issues, facilitating timely solutions.
- Fostered positive work atmosphere, contributing to improved team morale.

Bar Manager

The Hungry Heart | Wichita, Kansas | October 2012 - March 2017

TECHNICAL SKILLS

- Core concepts: OOP, data structures, algorithms, debugging, SDLC, unit testing, software security
- Development tools: Git, Visual Studio, Eclipse, Android Studio
- Database management: MongoDB, SQL
- Programming languages: C++, Java, Python
- APIs and frameworks: REST APIs, Spring Boot
- Testing and security: JUnit, OWASP Dependency-Check

EDUCATION

Bachelor of Science

Computer Science
Southern New Hampshire University,
Manchester, NH
(In Progress)

- Every Semester 2025-2026 - Dean's List
- Every Semester 2025-2026 - Honor Roll
- 4.0 GPA

Expected in December 2026

- 
- Oversaw bar operations and staff scheduling to maintain smooth service during peak hours.
 - Managed inventory of beverages and supplies to minimize waste and ensure product availability.
 - Developed innovative cocktail menus to elevate customer experience.
 - Trained new bartenders in drink preparation and service techniques.
 - Ensured adherence to health and safety regulations within the bar area.
 - Facilitated team meetings to enhance service quality and set clear performance expectations.

Delivery Driver

FedEx Ground | Wichita, Kansas | February 2007 - August 2012

- Navigated efficient routes to ensure timely package deliveries.
- Delivered packages under strict deadlines, achieving high accuracy in all shipments.
- Operated vehicle cautiously in diverse weather conditions, ensuring safe and reliable deliveries.
- Confirmed delivery details with customers, resolving inquiries to enhance customer satisfaction.
